# 1. Introduction

Token Name: **BNTX – Bintex Token**

BINTEXFUTURES is a proposed cryptocurrency exchange which will trade in Bintex Token and other cryptocurrencies. It will have the essential USPs of a centralized exchange like speed and convenience with the security advantages of a decentralized exchange. We will construct a world-class crypto Exchange which will fuel the future of crypto-currencies and this could be an opportunity for you to help us do it.

## 1.1 Vision

The foundation of a decentralized trading system that's unified and productive to meet handy applications. Constructing a totally decentralized economical and productive exchange within the Blockchain will not only empower clients to have control over their crypto assets but will also enable them to trade freely and make extra profits.

"A decentralized exchange is a trade system that doesn't depend on a 3rd party service to hold customer's assets. Rather, trades happen straightforwardly between clients (peer-to-peer) through an automated process."

Decentralized exchanges are a do-it-without anyone else's help trading system, where users don't endow their crypto-assets to a middleman and trades are executed P2P using smart contracts. Users hold responsibility for their crypto holdings and private keys. Cryptocurrencies are held on the Blockchain and not in a central location. Hence if an attack happens on the exchange crypto assets can't get hacked.

## 1.2 Background

In the past few years Cryptocurrency market has been constantly growing. Owing to its exponential growth, it has become a multibillion dollar industry, engaging investors who consider it to be a stage for bringing in brisk cash. During 2017, Bitcoin's worth increased about 2000% and some Cryptocurrencies saw returns of 25000% during their IEOs.

Our goal at the **BINTEXFUTURES** is to ensure that all investors can be a part of this extraordinary development by providing the market's usable, unified, productive and secure exchange.

Distributed Ledger Technology (DLT) and Blockchains are being recognized globally. Companies like Google, Microsoft, Facebook, Amazon and Telegram have started using or building up their own Blockchain technology.

Traditional Crypto trading, management and payment system need another model and the business is inclining towards decentralized exchanges (DEXs) as the solution. As distributed ledger technology evolves, centralized exchanges, regulators and governments need to accomplish more to shield crypto investors from the danger of robbery and losing their holding. DEX's wipe out the intrinsic issues with centralized exchanges, specifically security vulnerabilities, centralized control of digital assets, custodian challenges and more.

**“A purely peer-to-peer version of electronic cash would allow online payments to be sent directly from one party to another without going through a financial institution”**

***Satoshi Nakamoto's world-famous Bitcoin paper in 2008.***

## 2. Problems with Exchanges

### 2.1 Centralized Exchange

Regardless of the decentralized way of thinking given to the world by Satoshi, most of the biggest exchanges are built as centralized platforms like Bitfinex, Binance, Kraken, Coinbase, etc. 'store' their customer's crypto retaining full control over them. In such centralized exchanges, transactions happen fast because deposits occur outside the Blockchain. However the possibility of price manipulation/insider trading, high transaction fees makes a perfect profit-making setup for private owners in case they choose to opt for such tactics.

(1) The Founder of Ethereum, Vitalik Buterin, believes that Exchanges are Centralized because they serve as an interface between the fiat world and the cryptocurrencies. The Fiat world only has centralized gateways.

### 2.2 Decentralized Exchange

Problems mainly include:

- Low liquidity levels, low volume
- Inefficient, slow transaction speed, poor user experience
- Limited by cross-chain trading technical problems, limited trading cryptocurrency types, etc.
- The majority of the DEXs are for trading platforms for Ethereum and ERC-20 tokens.
- Front running is a common practice in Ethereum based exchanges

The primary issue is that the association with the fundamental chain confines the transaction execution and the proficiency is low. Additionally, because of the intricacy of cross-chain transactions, cryptocurrency selections in trade is limited.

## 2.3 Platform Security

### Security is Paramount!

There are many Exchanges, that went down because of their poor security. Most security breaches could have been prevented by taking simple precautions. The most critical risk for an investor is losing their entire investment. BINTEXFUTURES will be built to meet these higher expectations and will be audited undergo and penetration testing. Our Team members have experience building financial systems to the most noteworthy security gauges and will endeavor to guarantee security first. We aim to ensure that we follow the industry best practices when it comes to securing infrastructure and data including ISO/IEC and the Cryptocurrency Security Standard (CCSS).

## Secured Platform

The major concern for any investor trader is the safety of his assets. Questions like "Is it safe to endow my cash to the platform owners?" or "Can I trust the security experts behind the platform?" are perfectly reasonable. That is the reason we have developed our Platform with the mentality, "security first". We give different security layers, including unparalleled server-side security, hardware wallet storage and highest level of protection against phishing and DDoS threats.

## Previous Hacks

We have studied attack vectors and payloads used in the major/minor hacks performed in the past over exchanges and created a list of basic rules our exchange will follow. Among others, the set includes the following:

- ▶ Web Application Security (OWASP Top 10)
- ▶ Internal Penetration testing, risk and Vulnerability Management
- ▶ Secure and most trusted DATA Centre which follow highest security standards – ISO 27001, SOC 1 and SOC 2/SSAE 16/ISAE 3402, PCI Level 1, Sarbanes-Oxley (SOX), FISMA Moderate.
- ▶ Web Server Application Firewall and Security Filters
- ▶ Isolated Database Environment
- ▶ EV Certificate SSL/HTTPS + HSTS
- ▶ Strong Password Policy with mandatory Two-factor authentication (SMS verification, Google Authenticator)
- ▶ Modern hashes (Argon2i, bcrypt, scrypt or PBKDF2) to store system keys and passcodes.
- ▶ Data encryption using AES-256 encryption

## 2.4 Liquidity

It's very common in exchanges to publicize bogus liquidity with the intention of attracting Investors and traders to their foundation. Users are significantly impacted by a shallow order book as it contributes to multiple risk factors, order failures, expensive cost for financial assets and lack of transparency in the exchange. Attracting miners, investors and large traders to a new exchange is not easy and requires a professional team with deep industrial experience and resources. The team and its associates has the necessary experience and has no intention to resort to any dubious and unethical business practices.

### Solution

Our smart BNTX tokens with their ability to improve and expedite liquidity will play a major role in maintaining platform liquidity when trading multiple coins. BINTEX Tokens will be integrated within BINTEXFUTURES Exchange to allow investors to instantly convert their holdings into BNTX.

BINTEXFUTURES will charge transaction fee for the instant trades. All fees are payable ONLY with BNTX tokens to ensure liquidity and utilization of the tokens.

We are adding multiple coins and tokens based on their volume trading and validation so that system liquidity is ensured.

### Security tokens

BINTEXFUTURES will provide a platform for resale of trustworthy security tokens. The sale of security tokens on Blockchain, real estate, commodities and other types of tradeable goods will massively increase the liquidity.

## 3. BINTEXFUTURES

### 3.1 EXCHANGE

### Matching Engine

Our matching engine can sustain 1.5M orders / second and will make BINTEXFUTURES one of the fastest exchanges in the market. In our exchange, you can be certain that your orders will never be stuck due to the matching engine being overwhelmed.

### Features:

- Spot trading
- Digital Token
- Margin trading
- Futures
- Peer to Peer
- Decentralized (on-chain) exchange

## Supported Coins

BINTEXTFUTURES will support trading pairs in the following coins:

<b>BTC</b>	<b>NEO</b>	<b>BSV</b>	<b>EOS</b>	<b>BCH</b>
<b>ETH</b>	<b>IOTA</b>	<b>TRX</b>	<b>DASH</b>	<b>ADA</b>
<b>XRP</b>	<b>NEM</b>	<b>BAT</b>	<b>WAVES</b>	<b>OX</b>
<b>BNB</b>	<b>ZCASH</b>	<b>XMR</b>	<b>LTC</b>	<b>ZEC</b>

More coins will be added over time. We will generally add only those coins that have strong credibility, user base and liquidity. We also have the plan to integrate FIAT such as USD, RMB, JPY, INR and KRX in future.

The login form features the BINTEX Futures logo at the top. It includes two input fields for 'Email address' and 'Password'. Below these is a checkbox for 'Remember Password'. A large green 'LOGIN' button is centered at the bottom. At the very bottom, there are links for 'Register' and 'Forgot Password?'.

The register form features the BINTEX Futures logo at the top. It includes input fields for 'User Name', 'Email address', 'Password', and 'Confirm Password'. There is also an optional field for 'Referral ID (Optional)'. Below the fields is a checkbox for 'I agree to Terms & Policy'. A large green 'REGISTER' button is centered at the bottom. At the very bottom, there is a link: 'Already have an account? Login'.

- Travel Bookings
- Hotel Bookings
- Entertainments
- Shop Online
- Convert your tokens to INR

- Mobile Recharge
- Electricity bills
- DTH bills
- Gas bills

## 3.2 BINTEX NATIVE CURRENCY

### The BNTX Token

An ERC-20 Ethereum Token will be used as the base currency on the BINTEXFUTURES Exchange. All traders on the exchange must own BNTX to participate in our commission based, non-custodial markets. This fuels a demand for BNTX from traders and is an integral part of the revenue model. To sustain the operations, the exchange charges a transaction fees on all trades. To supplement its revenue, it will also mint a small number of new BNTX tokens each year and selling them in well publicized and transparent token sales.

### 3.3 BintexPAY Wallet

Every Exchange User will have a private wallet to access their assets, this wallet will provide Blockchain addresses for each User. Each user on our exchange will be provided with an individual address for each type of asset. QR code scanning enabled for withdrawals and deposits.

### 3.4 BintexPAY Card

Users will be able to access available BINTEX Token in their wallet directly through a BintexPAY chip card, thereby opening a wide range of possibilities. User can convert and withdraw BINTEX Token in the form of fiat. Users will be able to use these cards on a payment gateway to pay bills/recharge/shop etc.

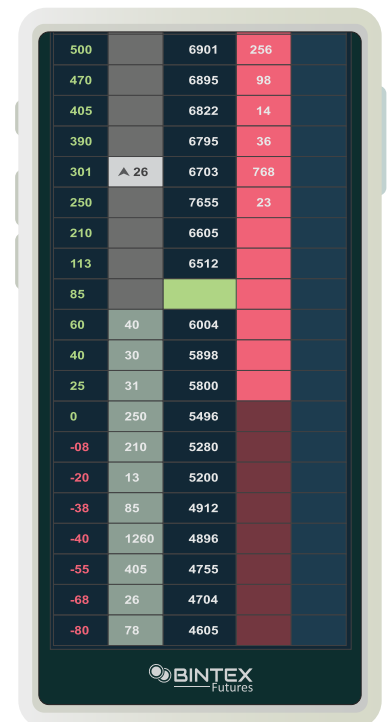

### 3.5 Device Coverage

We will provide cross-platform trading

- Web-based trading client
- Android native client
- iOS native client (pending App Store review)
- PC (Windows) native client

### 3.6 Multilingual Support

Crypto and Blockchain is a global financial system with no borders and no governing body. Our vision is to have a multilingual platform. We will support English, German, Hindi, Chinese, Japanese and Korean on our platform, At a later date more language support will be added on the system.

## 4. Business Model

### 4.1 BINTEXFUTURES

The BINTEXFUTURES Platform will be the major source of revenue for the company. Exchange will have Several Service.

- ◆ Exchange Trading Fees
- ◆ Coin/Token Listing Fees

BINTEX will actively participate into innovative Blockchain projects and list new tokens and crypto-coins on the exchange. Which will bring both liquidity and users associated to the project.

The exchange has some fee based innovative services that it plans to offer to its users. These services will be mutually beneficial and will be introduced in a phased manner.

### 4.2 BNTX Token

Demand for BNTX token from traders is an integral part of the revenue model. A total of 20M BNTX tokens will be created, never to be increased. BNTX will run natively on Ethereum Blockchain with ERC20.

- ◆ Initial Exchange Offering for the BNTX Token to attract investors and traders to the Coin and the Exchange
- ◆ BNTX token will be the base currency for the BINTEXFUTURES Exchange.
- ◆ Crypto-holdings in BINTEXPAY Wallet will also be rewarded annually with BNTX token as an interest.
- ◆ Up to 80% lower fees than major exchanges by using BNTX Token

### 4.3 BintexPAY Wallet

BINTEX platform will also run on a wallet system for each user which will hold all the information regarding user's holdings, trading history, Credit history, payment information, BintexPAY Card details.

- ◆ Buy, Sell, Store, Spend, and Pay with cryptocurrencies
- ◆ Withdrawal minimal charge which will be converted and paid to the BINTEX System in the form of BNTX Token.
- ◆ Users have access to all upheld cryptocurrency data and charts directly within the BINTEXPAY Wallet. These features will allow users to have full insight on the cryptocurrencies that BINTEXPAY Wallet supports with charts, circulating supply, total supply, daily volume, and more for each cryptocurrency.
- ◆ BINTEXPAY Card credit, payment cycle, card statement, card usage will be accessed through the wallet.
- ◆ Real-time CARD spending history with geo-location of merchant.
- ◆ Loan against Crypto, Loan payments can be done through BINTEXPAY Wallet.
- ◆ The Wallet app will be available on both Google Play Store and Apple Store.

## 4.4 BintexPAY CHIP CARD

It is proposed to position and push BintexPAY debit/credit card in a manner that it will be accepted at myriad locations globally. This cryptocurrency card will be linked to the users BintexPAY Wallet enabling them to spend their BNTX tokens with real-time conversion powered by the BINTEXFUTURES.

- ◆ BNTX as a native card currency will bring extra revenue to Bintex system and more profits for the community.
- ◆ Change PIN directly within the BintexPAY Wallet.
- ◆ BNTX to fiat conversion fees during usage of BintexPAY Card on multiple payment channels.
- ◆ Real-time fiat conversions with BINTEXFUTURES.
- ◆ Credit against crypto will be introduced in BintexPAY chip cards. Interest and fees on late payments will be credited in BINTEX system after converting fiat to BNTX.
- ◆ Cashback program for card users.
- ◆ Partnerships with fiat payment systems will help BintexPAY cards to be accepted on millions of physical locations and online platforms.
- ◆ Proposed acceptance on Apple pay & Google pay.
- ◆ Total control through BintexPAY Wallet.
- ◆ Multiple card type with more and more rewards features according to user's need.

**Every quarter profits from the BINTEX System will be calculated and after due appropriations, will be used to burn BNTX Tokens.**

## BNTX Token Sale and Economics

Token Sale Start Time	September 24th
Token Sale End Time	When Hard Cap is reached
Hard Cap	3750 ETH
Total Token Supply	20,000,000 BNTX
Public Sale Token Price	1 ETH = 1547 BNTX
Launchpad Allocation	6,000,000 BNTX (30% of Total tokens supply)
Public Sale Vesting Period	4% Release every hour
Individual Cap	50 ETH
Individual Minimum Purchase Amount	0.01 ETH
Token Type	ERC-20

## TOKEN DISTRIBUTION

LID Team	1%
Airdrops	4%
Team	15%
Marketing & Development	15%
Liquidity	15%
Staking Rewards	20%
Presale	30%

## Token Allocation

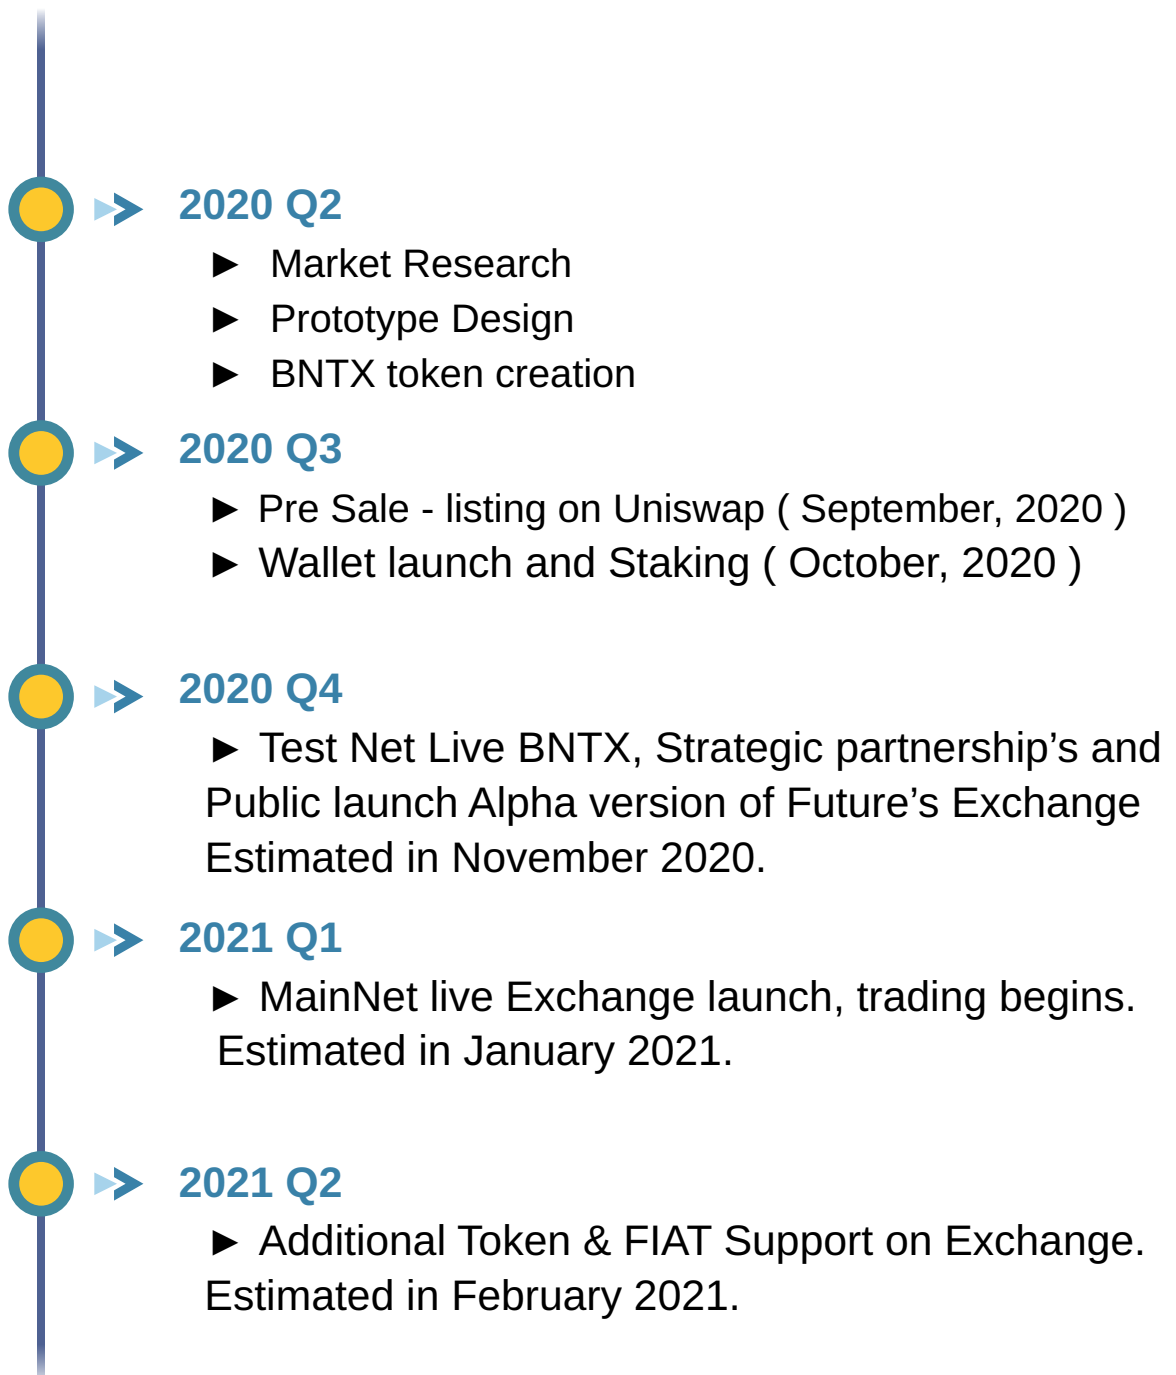

## 5 Fund Usage

- ◆ 40% of the funds will be used to build the Bintex Futures platform and perform upgrades to the system, which includes team recruiting, training, and the development budget.
- ◆ 45% will be used for Bintex Futures branding and marketing, including continuous promotion and investor education of Bintex Futures and Blockchain innovations. A budget sufficient for various advertisement activities / channels is being factored.
- ◆ 15% will be kept in reserve to cope with any emergency or unexpected situation that might come up. It will also be used for any Bintex social welfare programs that may be taken up.
- ◆ Every quarter profits from the BINTEX System will be calculated and after due appropriations, a designated part of the profits will be used to burn BNTX Tokens.

## 6. ROADMAP

### History

## 6.1 BintexPAY Wallet Launch

- ▶ Our First mobile wallet application is Estimated to be launched in September 2020.
- ▶ Wallet will be launched on Android and IOS app stores.

## 6.2 TESTNET

- ▶ After a successful Wallet launch on mobile devices, BINTEX will launch it's BINTEXFUTURES Exchange BETA with major Coin and FIAT support in December 2020.
- ▶ All our BintexPAY Wallet users will be able to test the BETA.

## 6.3 BINTEXFUTURES

- ▶ After 1 year of Successful IEO, main focus of our team will be getting a fully developed and tested Trading platform.
- ▶ This will Include a Fully functional BNTX Trading Exchange and Crypto Wallet which will support all major cryptocurrencies.

## 6.4 Additional Token Partnerships

- ▶ After 6 months of Successful Platform launch, BINTEX will be more focused towards new partnerships, new Blockchain projects and adding more and more token supports on Exchange platform.
- ▶ We want to make BNTX a boundaryless and globally accepted currency. To make this happen, we will add more FIAT and add local Open Wallet Support in BINTEX Eco-system.

## 6.5 FUTURES and Margin Trading

- ▶ After 1 year of successful IEO and with fully functional Exchange platform, we will add up to 100x leverage trading support in our Eco-system.
- ▶ Faster execution, low fees and More crypto derivative trading support.

▶ Futures API will conform to the Swagger spec for REST endpoints. Any Swagger-compatible client will be able to connect to the BINTEXFUTURES API and execute commands.

## **6.6 BintexPAY Chip Cards**

▶ After 1 year of Successful IEO and 9 Months of fully functional BINTEXFUTURES Ecosystem, we will bring a BintexPAY Chip card for all BNTX Token holders.

▶ BintexPAY Chip cards will bring more investor partnerships and relationships which will make it easier for BNTX holders to use their funds on more and more platforms.

## **6.7 E-Commerce**

▶ With Chip cards in circulation, BINTEX will add an E-Commerce platform in the BINTEX Eco-system.

▶ Local shipping , Retail ECOM Stores with Only Crypto accepted and transactions will be processed through BintexPAY Chip Cards.

## **6.8 ROADMAP Update and The Vision**

▶ With the support of our Community and hard work of our Team, BINTEX will launch more and more platforms to meet the daily use of a human being.

▶ With such wide range of projects and products in our ECOSystem, our vision and our community will grow together.

▶ We will update our Roadmap after each successful launch.

## 7. RISKS

**Policy Risk:** At present, the Indian government has not published any unequivocal position with respect to Blockchain activities, crypto currencies and IEO financing and so it is possible that the users may be impacted by future policies that maybe announced.

**Systematic risks:** These allude to potential changes brought about by normal elements of general significance and have similar affect in the performance of all Blockchain organizations. Systematic risks also include force majeure factors which among others include catastrophic events, enormous outages / scope breakdowns of worldwide PC systems and political turmoil.

**Supervision absence risk:** Digital resource exchanges, including BNTX, have incredibly high uncertainty. In the absence of powerful industry supervision / framework in advanced resource exchanges, electronic tokens are susceptible to sharp rise and falls.

**Dangers after supervisory guidelines are shaped:** It can't be denied that sooner rather than later, supervisory guidelines will be framed to limit the fields of Blockchain and electronic tokens. In the event that supervisory and administrative bodies play out a standard administration over these fields, the electronic tokens bought during the IEO time frame might be influenced. The effects incorporate, however are not constrained to, cost and dependability variances and limitations.

There is solid market competition and so whether the BINTEX token can stand apart among numerous strong activities / campaign of its competitors is a risk. It proposes to build and drive its market through a group and has several USPs for this, but again in an unregulated market, it is likely to be impacted by any unethical / unfair practices from business rivals.

**Risks within the team:** BINTEX has a group of highly skilled team members of diverse skill sets and maturity levels. This of course includes senior specialized experts/ designers /developers in the Blockchain field. Team cohesion and unity is very important and changes in team or the dynamics will have some impact on th working.

**Risks about task coordination and showcasing:** The Team establishing BINTEX group will spare no efforts to achieve the objectives stated in this white paper. At present, BINTEX has a moderately mature business model that it proposes to use. In view of the evolving changes in the market for business improvement, changes existing business models, feedback from the advertisement and other campaigns, this white paper may be revisited and suitably modified to incorporate changes needed in view of these inputs. There is a risk in the probability that the IEO members neglect to read or understand the changes and its impact, after the venture refreshes the white paper / objectives in due course or, if the general population neglects to completely comprehend the impact because of data asymmetry, the impact on the performance of this venture many not be anticipated or resolution planned for.

**Risks about venture innovations:** This venture depends on a cryptographic calculation. Quick advancements of cryptology will definitely invite risk / danger of framework breaks.

Cryptology's centre organizations are bolstered by advancements like Blockchain, disseminated record, decentralization, etc. The BINTEX group can't completely ensure innovation to completely satisfy the threat from these threatening tech advancements.

Escape clauses might be found during venture redesigning, which can be cured through a patches discharge. Notwithstanding, the level of being affected by escape clauses can't be resolved.

**Risks about programmer assaults and violations:** With respect to security, one individual is exceptionally little, yet the general number of individuals is incredible. This has put a high need upon the venture's security confirmation. Since they have attributes like secrecy and unchanging nature, tokens might be utilized by crooks or potentially programmers for crime.

**Other dangers obscure at present:** With constant advancement of Blockchain innovation and changes the general business, BINTEX may confront business challenges that can't be anticipated at present. Investors and others associated with this venture must understand all the various risks cited above and also factor in for those that cannot be anticipated now before making the choice. They ought to deal with their desires and participate in the Token dissemination sensibly.

## 8. Disclaimer

- ▶ This Document, serves only the purpose of conveying information. The content of this report are just for reference and don't plan to make any proposals or solicitations to request enthusiasm for or buy stock or protections.

- ▶ This Document shall not and cannot be considered as an invitation to enter into an investment. Any conduct related with this white paper, including any request for acquiring a duplicate of this white paper or offering this white paper to other people, won't be regarded as interest in the IEO.
- ▶ The participant in IEO or the purchaser of BNTX token undertakes that (s)he/it understands and has significant experience of cryptocurrencies, blockchain systems and services, and that (s)he/it fully understands the risks associated with the Token Sale as well as the mechanism related to the use of cryptocurrencies (incl. Storage). All IEO members should sign the agreement wilfully and must have a high Knowledge about BINTEX before signing the agreement.
- ▶ The BINTEX group will keep on performing sensible tests to ensure genuineness and exactness of the data in this white paper. During the advancement procedure, the stage might be refreshed. The updates incorporate, however are not constrained to, stage components, electronic tokens and their systems, and appropriation of electronic tokens. Some report substance might be balanced in like manner in the new white paper with the task's turn of events. The group will make open the progressions to the white paper through a declaration or by posting the refreshed white paper on its website. The member must get the most recent white paper and modify their desires in like manner. BINTEX won't accept any misfortunes by the member brought about by:
  - (i) the member depending on the content of the white paper;
  - (ii) data incorrectness in the white paper; or (iii) any practices brought about by the white paper.

- ▶ As an encoded token utilized in BINTEX, BNTX doesn't have a place with any of the accompanying classes: (a) cash of any sort; (b) protections; (c) stock privileges of a lawful substance; (d) stocks, bonds, charges, warrants, testaments, speculation contract, or different instruments bearing comparative rights.
- ▶ Whether BNTX will acknowledge or not is controlled by the market and the requests after application satisfaction. Now and again, BNTX may have no an incentive by any means. The group will make no duties about its thankfulness and will accept no obligations for outcomes brought about by an expansion or diminishing in its worth.
- ▶ To the most extreme degree permitted by law, the group will accept no obligations for any harms and additionally chances emerging from token dissemination cooperation, which incorporate, however are not constrained to, immediate or roundabout individual harms, loss of business benefits, loss of business data, and some other financial harms.
- ▶ The BINTEXFUTURES will watch supervisory guidelines for sound improvement of the IEO business and the business' selfcontrol articulations. Interest implies that the member will totally acknowledge and watch these practices. The data uncovered by the member to finish these investigations must be finished and exact.
- ▶ The BINTEXFUTURES has unequivocally passed on potential dangers to members. Interest in token appropriation procures that the member has affirmed his/her comprehension and acknowledgment of every condition and guidance in the itemized rules, acknowledges the potential dangers about this stage, and will expect results without anyone else/herself.

- ▶ As the official token of BINTEX, BNTX is a significant instrument for the BINTEXFUTURES to perform proficiently. Nonetheless, BNTX isn't a security, and claiming BNTX doesn't imply that its proprietor has been managed with the restrictive right, controlling right, as well as approach making right in regard to the BINTEXFUTURES
- ▶ BINTEX is not to be considered as advisor in any legal, tax or financial matters. Any information in the white paper is given for general information purpose only and BINTEX does not provide with any warranty as to the accuracy and completeness of this information.

## 9. Representation and warranties

By participating in the Token Sale, the buyer consents to the above mentioned and specifically, they represent and warrant that they:

- ◆ have read cautiously the terms and conditions appended to the white paper; consent to their full content and acknowledge to be lawfully limited by them.
- ◆ are over 18 years of age or have arrived at the age where are able to go into a legally binding relationship in the nation of home.
- ◆ live in a country which permits the BINTEX FUTURES to sell the BNTX token through a crowdsale without requiring any legal authorization.
- ◆ have full approval to follow up for the lawful element which will buy the BNTX token, if following up for the benefit of a lawful element.

- ◆ won't utilize the crowdsale for any criminal behavior, including however not constrained to illegal tax avoidance and the financing of fear-based oppression;
- ◆ have adequate information about the idea of the cryptographic tokens and have noteworthy involvement in, and utilitarian comprehension of, the utilization and complexities of managing cryptographic tokens and monetary standards and blockchainbased frameworks and administrations;
- ◆ know about completely related guidelines in the particular ward in which s(he)/it is situated in and that buying cryptographic tokens in that locale isn't disallowed, limited or subject to extra states of any sort. (Participants can't add to the Token Sale if there are pertinent lawful limitations in their nation of living arrangement. It is the obligation of every member to know these laws and think about them before their support in the Token Sale).
- ◆ buy BNTX tokens on the grounds that s(he)/it wish to approach the BINTEXFUTURES Exchange and to utilize their different usefulness or potentially in light of the fact that's(he)/it wish to help the further turn of events and promoting of the BINTEX services as well as in light of the fact that's(he)/it wish to encourage advancement, testing, sending and activity of blockchain-based or related applications.
- ◆ Countries excluded in addition to standard list (Afghanistan, Bosnia And Herzegovina, Cayman Islands, Democratic People's Republic of Korea (DPRK), Ethiopia, Iran, Iraq, Pakistan, Sri Lanka, Syria, Trinidad and Tobago, Tunisia, Uganda, The United States, Yemen) US resident or inhabitant and are not buying BNTX token with the end goal of theoretical venture or use.
- ◆ defer the option to take an interest in a legal claim or a class-wide mediation against the BINTEXFUTURES and its Affiliate Parties.
